Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on February 12, 2003, paper number 35, has been entered.

DETAILED ACTION

Applicants amendment filed February 12, 2003, paper number 37, has been received and entered. claims 36-55 have been added. Claims 36-55 are pending and currently under examination.

Specification

The nucleotide sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825.

Applicants note that a response to the sequence disclosure requirements was made in responses filed November 1, 2000 and July 30, 2001.

Examiner has reviewed these two responses and amendments, however the specification contains sequences which are not listed in the sequence listing. The four amino acid sequences

Art Unit: 1632

on page 20, lines 5-6, are not identified with SEQ ID NOs. Additionally, further down page 20, line 35, the amino acid sequence is not identified with a SEQ ID NO identifier. It appears that this sequence is SEQ ID NO: 14, but the specification has not been amended to indicate this.

Appropriate correction is required.

Priority

This application is a 371 national stage filing of PCT/AU97/00492, filed August 1, 1997, which claims benefit of US provisional application 60/024,279, filed August 21, 1996. It is noted that the claim of benefit to 60/024,279 is not present in the first line of the instant specification.

If applicant desires priority under 35 U.S.C. 119(e) based upon a previously filed copending application, specific reference to the earlier filed application must be made in the instant application. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. _____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

If the application is a utility or plant application filed on or after November 29, 2000, any claim for priority must be made during the pendency of the application and within the later of

Art Unit: 1632

four months from the actual filing date of the application or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2) and (a)(5). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) a surcharge under 37 CFR 1.17(t), and (2) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Commissioner may require additional information where there is a question whether the delay was unintentional. The petition should be directed to the Office of Petitions, Box DAC, Assistant Commissioner for Patents, Washington, DC 20231.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Art Unit: 1632

This is noted because it appears that most of the references cited in the specification have been indicated in an IDS, however a direct comparison has not been done by the Examiner. References cited but not provided in an IDS have not been specifically considered.

Conclusion

Claims 36-55 are allowed. As indicated in the previous office actions, the claims are free of the art of record because the art failed to teach or suggest the specific chimeric enzyme comprising a Golgi localization signal and catalytic domain of a fucosyl transferase. Further, there was no expectation that the encoded chimeric enzyme expressed in cells would act competitively with other endogenous transfereases to reduce the amount of gal- α -(1,3)-gal in said cells. Finally, the newly added claims are directed to subject matter which was indicated to be enabled under 35 U.S.C. 112, first paragraph.

This application is in condition for allowance except for the following formal matters:
the specification is objected to because the application is not in sequence compliance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
